**Manufacturing Premium
Surface Preparation & Air Filtration
Equipment**

Your One Stop Source for Surface Preparation and Air Filtration Equipment

Durable and Dependable

Novatek. It's the name you can rely on for surface preparation and air filtration. All equipment supplied by Novatek is designed to be durable, dependable, and perform efficiently.

High Performance and Industry Tested

Novatek supplies only the finest industrial surface preparation & air filtration equipment available. All Novatek products are manufactured to the highest quality standards to ensure years of trouble free operation. Whether you are removing coatings, rust, scale, concrete, sheet goods or virtually any other material, Novatek has the product to get the job done.

High Performance, Low Emission

Our low emission levels meet the federal emission standards and the requirements of the EPA and OSHA. In tests conducted by an independent lab on lead based coating removal, our systems demonstrated the ability to stay below the Personal Exposure Levels of 50 micrograms per cubic meters and Action Levels of 30 micrograms per cubic meter in both controlled environments and field studies.

Wide Variety, Versatile and Cost Effective

The Novatek tools & equipment range from hand held machines for spot cleaning, portable air filtration for dust control, to large "walk behind" concrete grinders and scarifiers. Novatek can custom tailor a system that will maximize production and provide the most cost-effective method available. All equipment provided by Novatek has the ability to be shrouded for dustless applications. For your next coatings removal / surface preparation project be sure to contact Novatek for a free on-site demonstration. **" We let the tools do the talking !"**

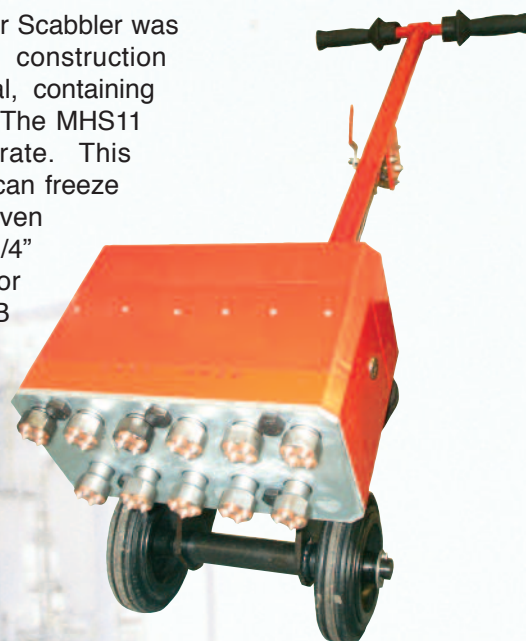

If you would like more information about the advantages of working with Novatek netzerotools.com

MULTI-HEADED CONCRETE SCABBLER

The MHS11 & Shrouded MHS11 Floor Scabbler was designed in association with construction engineers for thick coatings removal, containing and surface preparation of concrete. The MHS11 minimizes damage to the substrate. This prevents the ingress of water which can freeze and cause cracking. The MHS11 is even capable of concrete removal of up to 1/4" in one pass, making it ideal for removing radioactive or PCB contaminated concrete. Optional cruciform heads are available for material reduction with a smoother finish.

FEATURES BENEFITS:

AND

Tungsten Carbide Tipped Heads

- 11 heads giving 2200 blows per minute per piston
- Designed to reduce damage to aggregate

Unique Cutter-head Action

- Piston exhausts into chamber which reduces wear to moving parts
- Prolongs tool life

3 Point Vibration Damping System

- Reduces operator fatigue
- Gives better control

Low Air Consumption

- Only requires 70cfm
- Economic running costs
- Operates from a single tool compressor

Compact Design

- Body width of only 11" (280mm) for work between structures

Works Within 1/2" of Walls

- Reduces the need for further finishing, tools and operations

Large Rear Wheels

- Aid maneuverability

Model	Part No.	Weight	Length	Height	Width	Cutting Width	B.P.M.	Air Consumption
MHS11	159.6000	154lbs(70kg)	13.4"(340mm)	50.8"(1290mm)	11.2"(285mm)	9.84"(250mm)	11 x 2200	70cfm(1982 lpm)
Shrouded-MHS11	159.6001	160lbs(70kg)	13.4"(340mm)	50.8"(1290mm)	11.2"(285mm)	9.84"(250mm)	11 x 2200	70cfm(1982 lpm)

As a major source of surface preparation and air filtration equipment, Novatek is a valuable resource with over 60 years of combined experience. Novatek offers a wide variety of Pneumatic, Electric and Gas powered equipment ranging from portable hand tools to large walk behind machines. We specialize in manufacturing equipment for hazardous environments and can custom tailor systems for Lead paint removal, Radiological Denominations, PCB removals and Asbestos Abatement; that's just to name a few. Whether you are spot cleaning coatings or removing contaminated concrete, Novatek has the equipment to

"DO THE JOB AND DO IT WELL".

**B.P.M.=Blows Per Minute
lpm=Litres Per Minute
cfm=Cubic Foot/Minute
Aeq=Acceleration equivalent
LpA=Sound Pressure Level
LwA=Sound Power Level
psi=Pounds Per Square Inch**

All of our equipment is thoroughly tested under specified conditions in accordance with applicable internationally recognized standards. When a tool is used on site the conditions may not be the same as those used in our tests.

Novatek Corporation operates a policy of continuous product development and refinement and therefore reserves the right to change technical specifications and product designs without giving prior notice.
